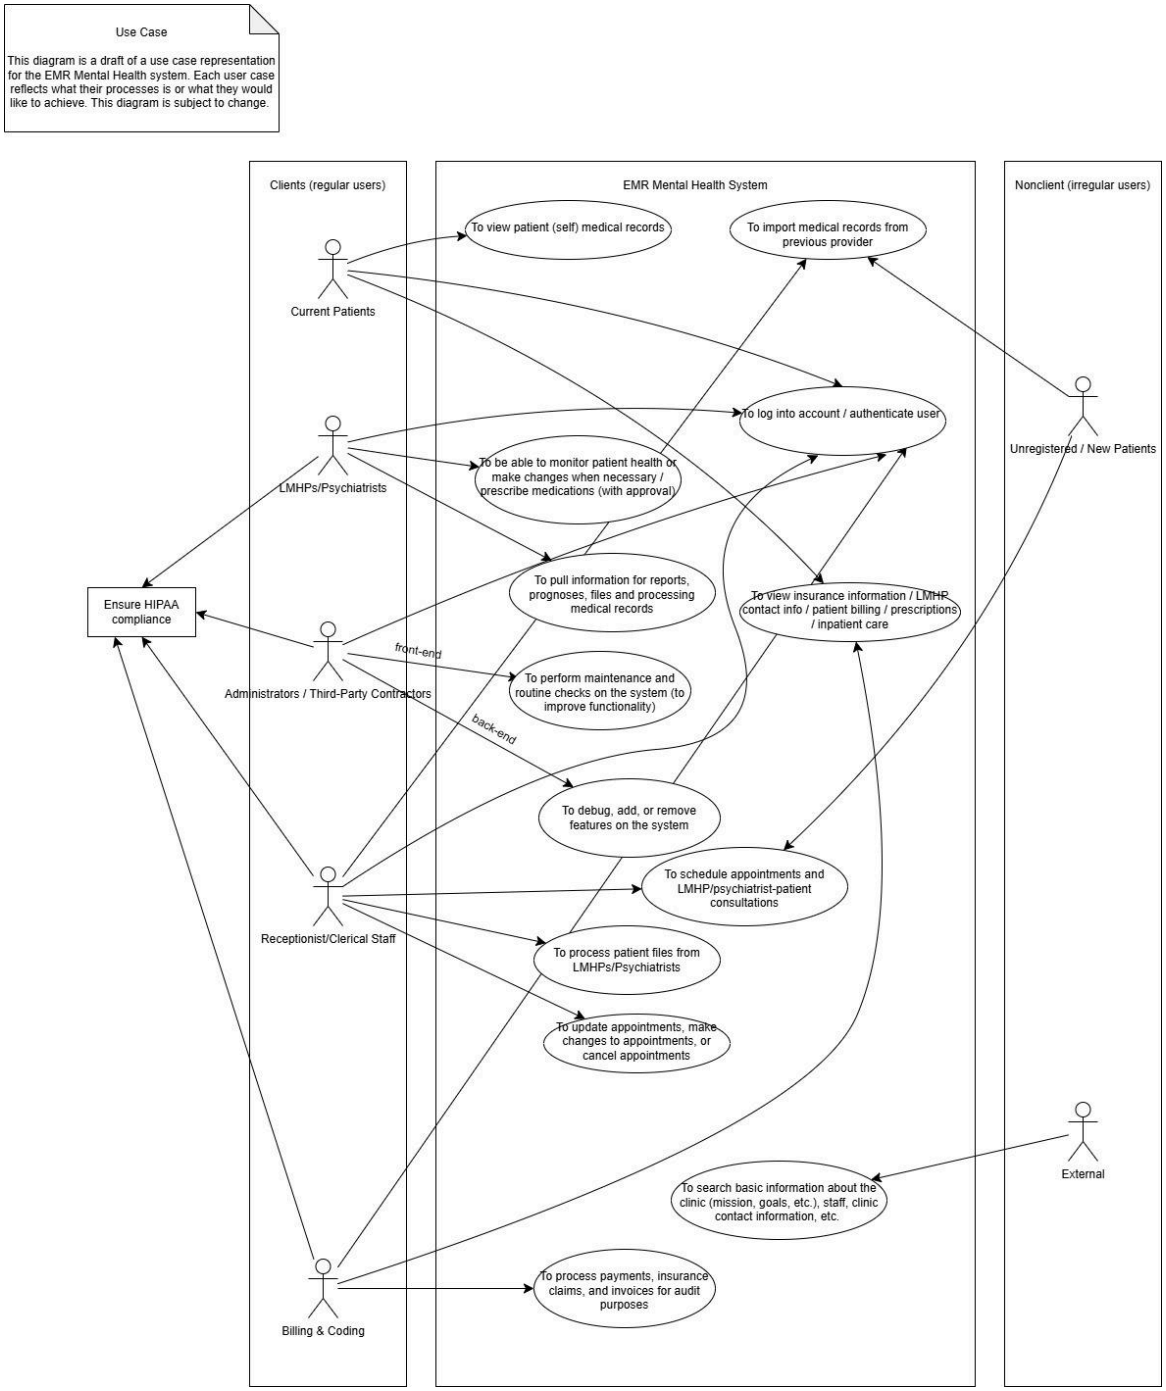
Task 1: User Network

[EMR mental health database. - Google Sheets](https://drive.google.com/file/d/13jacvuGAYsywSd_8NPdG2yV0gVq3fp9S/view?usp=drive_link) → AppScript (JavaScript)
https://drive.google.com/file/d/13jacvuGAYsywSd_8NPdG2yV0gVq3fp9S/view?usp=drive_link
(updated copy)

Final Draft



Users

- Patients / Users (current and new)
- LMHP (Licensed Mental Health Professional) / Psychiatrist
- Administrators (third-party contractors) → tech support, IT help desk, etc.
- Receptionist or clerical staff
- Billing & coding

Example (ref.)

Use Cases (Table form) for EMR				
	User Profile	**Client Type**	**User Story**	**Task 1**
	Patient (current)	Standard (Child)	As a patient, I want to schedule and manage my appointments so I can access care at times that work for me.	Manage ongoing patient care
	LMHP/Psychiatrist	Standard (Parent)	As a LMHP/psychiatrist, I want to control what the patient sees and be able to monitor patient health so I can ensure treatment is	Manage patient clinical oversight (telehealth)

Use Cases (Table form) for EMR				
Product Backlog			delivered safely and appropriately.	
	Administrators (third-party contractors/tech support/management)	Administrator	As an administrator, I want to perform routine checks so I can maintain upkeep.	Manage system administration
	Reception/Clerical	Standard	As a receptionist, I want to schedule appointments and consultations for patients so I can ensure patients receive timely care and avoid scheduling conflicts.	Manage patient/psychiatrist scheduling
	Billing & Coding	Standard	As a billing and coding specialist, I want to accurately capture, code, and submit patient services so I can ensure timely reimbursement and maintain compliance with insurance and regulatory requirements.	Process payments and submit claims
	Unregistered (new patients/customers)	Guest	As a new patient, I want to schedule my first appointment so I can begin receiving care as soon as possible.	Complete new patient intake process

Task 2: Front & Back End

Front End: The visual "stuff"

- Buttons
- Checkboxes
- Graphics
- Text boxes
    - → Making sure it's visually appealing, user-friendly and easy to navigate

Back End: Everything else

- Updates
- Routine maintenance
- Applications
- Databases: Draft of database
- Programming languages:
